

## **S610 WiFi Connection on Cell Phone(Other models have the same method as S610)**

Here are two guides for you to connect to wifi.

**Option one:** Setup with Cable Connection(Recommendation), this mode is stable and we recommend clients to use it for the first choice.

1. Plug the power adapter to the camera
2. Plug the network cable to the camera to connect to your router and **install the Antenna**
3. Run the App, and click "Add Camera"--" S610"—" Cable Connection"
4. Connect your cell phone to the wifi you want to set to camera
5. Follow the instruction in app, and scan QR code sticker at the bottom of camera-- Enter the password(default:sumpple) to finish settings.
6. If you want to turn to wireless WIFI Mode, please follow the instruction in app. Just select your wifi signal SSID, input the **correct wifi password**, pull out network cable and wait for wifi mode setting.

**Option two:** Setup with Wireless Connection

- 1.Plug the power adapter to the camera.
2. **Install the Antenna** and keep the camera and router in a short distance(1-5 meters)
3. Press the Reset button at the bottom of the camera for 10 seconds to start the resetting, then wait for 1 minute to finish the resetting. This step is very important for you connect the camera to wifi successfully.
- 4.Run the App, and click "Add Camera"--" S610"—" Wireless Connection "
- 5.Connect your cell phone to the wifi you want to set to camera-
- 6.Follow the instruction in app, and scan QR code sticker in the bottom of camera
7. Enter the **correct wifi password** and click "Next" to wifi connection mode setting.

Note: if you fail to connect, please press the Reset button for 10 seconds to start the resetting, then wait for 1 minute to finish the resetting, then try again.

### **PS:**

- 1.Please make sure you have open your wifi on your cell phone
2. Please make sure you have installed the Antenna
3. Please make sure your enter the correct wifi password, so many customer enter wrong password and can't connect to wifi

4. If the Antenna or WiFi model is broken caused by Logistics , there will not be connect to the wifi.
