

We are a new brand of camera. It seems that the Blue Iris software still does not list our brand to support on the menu.

But some customers told us that they can still use Blue Iris to view the video with our camera.

Please have a try the following brands whether it is working for our camera on Blue Iris.

// Allnet ALL2212

// Pyle

// Loftek Aegis H.264

// Apexis APM-H804-WS

// X10 AirSight XX39A

// 7Links PX-3677

Some setting images from Customers on Blue Iris in the following:
